WHAT IS AN ICO?

An Initial Coin Offering (ICO) is a fundraising mechanism in which a company or organization creates and sells a new cryptocurrency or token to the public. Investors can purchase the token with established cryptocurrencies such as Bitcoin or Ethereum with fiat currency. Current such as US dollars or euros. The funds raised through the ICO are typically used to finance the development of a new product or service or to cover operating expenses for an existing business.

ICOs have been used to defraud investors. while in other cases, they have been successful in raising significant amounts of funding. It is important for investors to thoroughly research any ICO before participating, and to be aware of the risks involved.
